Dear Water For People Supporter,

2021 was a year of reflection. We celebrated Water For People's 30th anniversary and completed our Strategic Plan 2017-2021. Upon realizing these milestones, we pause to acknowledge the progress from this past year, throughout our five-year strategic plan, and over our 30-year history of reaching communities with water and sanitation services.

We are proud to share with you that, since 2017, we have **impacted 4.67 million people with reliable water access** – surpassing the original goal of 4 million! Working with local entrepreneurs and businesses, we helped 1.77 million people gain access to sanitation services. We reached an additional 5.9 million people through work with other local organizations and governments to replicate the Everyone Forever model.

As you explore this Annual Report, you'll learn more about this progress and the people involved. This impact would not have been possible without your shared belief in a world where everyone has access to clean water and sanitation services, forever. Thank you.

Water For People's 30-year history has included periods of evolution – such as moving from a project-by-project method to the current Everyone Forever model. The COVID-19 pandemic has brought another era of change as we adapt to new styles of work, partnership, and leadership. We are proud of our teams around the world who have embraced flexibility and perseverance – continuing to support access to safe water, dignified toilets, and hygiene resources at a time when community health is critical.

In continuing our evolution, and in commitment to living our values, we restructured our leadership team in 2021. By expanding from a centralized senior leadership team structure to a global leadership team with representatives from India, Latin America, and Africa, we improve transparency, enhance the incorporation of regional perspectives, and promote equitable decision-making. Water For People is committed to elevating our global voices and ensuring organizational decisions and priorities are reflective of the countries in which we work. This is one example of how Water For People continues to emphasize Justice, Equity, Diversity, and Inclusion throughout our work culture, offices, and programs.

As we make progress toward reaching Everyone Forever, billions of people still lack access to safely managed water and sanitation services. Destination 2030 is our shared plan and vision to drive exponential progress toward United Nations Sustainable Development Goal 6: Clean Water and Sanitation For All by 2030. Learn more about our audacious plan on page 9.

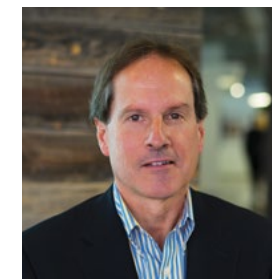

We have accomplished much in the 30 years since our founding. With your continued support of our critical mission to help end the global water crisis, we look forward to scaling our impact together in the years ahead toward our goal of Everyone Forever. Onward to Destination 2030!

Eleanor Allen
Chief Executive Officer

Bill Roe
Chair, Board of Directors

On the cover and opposite page: Solitario Ledezma Veliz lives in a community within Pocona, Bolivia. Thanks to partnerships with Water For People, he and his family have reliable access to water.

OUR VISION

A world where every person has access to reliable and safe water and sanitation services.

OUR MISSION

Water For People exists to promote the development of high-quality drinking water and sanitation services, accessible to all, and sustained by strong communities, businesses, and governments.

OUR VALUES

Accountability

Courage

Empowerment

Partnership

Transparency

EVERYONE

We spend years, not days, in communities. We work until every single person – even the hardest-to-reach, the most vulnerable, the marginalized – has access to safe and reliable water, sanitation, and hygiene services.

FOREVER

Forever means building from the ground up and top-down – empowering local communities and governments to invest in the long-term water and sanitation solutions that are right for them.

A LOOK BEHIND THE NUMBERS

As you explore the report, you will find numbers. Numbers reflecting people impacted, schools with improved water access, families with bathrooms, hospitals with hygiene resources, and agreements signed with governments.

And behind every single one of these numbers is a person.

LUCAS
NICARAGUA

Lucas stands proudly in front of the new bathrooms at his school. It wasn't long ago that their facilities were run-down and unsafe, making proper hygiene difficult. Thanks to collaboration between the community and Water For People, his school has new bathrooms and sinks for handwashing.

DOÑA EDONIA
BOLIVIA

Doña Edonia recently graduated as a plumber. With training from Water For People, she can make improvements to her bathroom as well as others in her community. And after 10 years of living in the town of Villa San Salvador, she now turns on a tap at home and water flows.

DR. IVAN MUJUNI
UGANDA

Dr. Mujuni feels prepared for infection prevention and control. His hospital is on the front lines of COVID-19, and through working with Water For People, they now have more handwashing stations, drinking water points, and safe waste management. He reports fewer cases of hospital-acquired or water-based diseases because of these improvements.

MINU MANDAL
INDIA

Minu relentlessly advocates for water in her community. From meetings with her local government to attending water point maintenance trainings from Water For People, she is fiercely committed to ensuring her community has lasting access to safe water.

These are the people behind the numbers.

As we reflect on this past year, we recognize that these extraordinary accomplishments would not be possible without your partnership and support.

To watch our thank you message and see a list of our valued donors, please visit waterforpeople.org/annualreport.

PROOF

MEASURING OUR IMPACT

The goal of Everyone Forever is to reach every family, clinic, and school with lasting water and sanitation. Our Strategic Plan 2017-2021 set out to prove this model works by continually reaching more people with water and sanitation services, promoting co-investment from our district partners, and creating and supporting local water and sanitation offices.

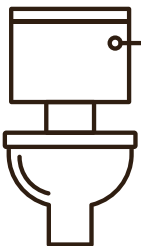

See our 2021 progress over the next few pages, and then explore our five-year strategic plan results and reflections starting on page 17.

2021 Progress

32

clinics with access to improved WASH

GLOBAL LEADERSHIP AND SCALE

GLOBAL LEADERSHIP

Global Leadership efforts focus on accelerating change by sharing success and important learnings of the Everyone Forever impact model.

In 2021, we presented at 45 conferences and external meetings. By amplifying voices and increasing visibility at the local, national, and global levels, Water For People is ensuring that lessons learned are in the hands of more people.

To share our colleagues' knowledge further, we held an internal blog competition. Nineteen program topic blogs were written, voted on, and published through Water For People's technical-focused website, The WASH Room. From rainwater harvesting in India to microcredit solutions in Guatemala, these pieces share lessons and reflections with other organizations and governments – furthering Water For People's experience-based leadership.

Visit [The Wash Room](#) to read these blog entries and more.

SCALE

Our Strategic Plan 2017-2021 Scale goals were built upon the district-level momentum of Everyone Forever to improve water and sanitation services at an even greater level.

In this spirit, Water For People has joined forces with IRC – a water, sanitation, and hygiene-focused nonprofit based in the Netherlands – to drive exponential and audacious progress.

In 2021, our organizations announced Destination 2030, a joint effort to close the gap for the estimated 2 billion people globally who still lack sustainable access to safe water, and the more than 4 billion who lack access to safely managed sanitation.

Our Destination 2030 vision is clear: the passionate pursuit of water, sanitation, and hygiene services for all.

Destination 2030 includes a joint strategy and monitoring framework developed together and shared by Water For People and IRC. Combining forces, we aim to deliver increased reach and scale in-country, expand to new countries with new partners, promote a shared approach to systems change regionally and globally, and share expertise to improve effectiveness. Destination 2030 was developed by diverse global teams local to the countries where both organizations work.

Visit waterforpeople.org/destination2030 to learn more.

WATER

Everyone and Forever Milestones

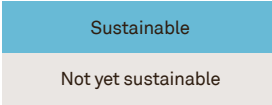

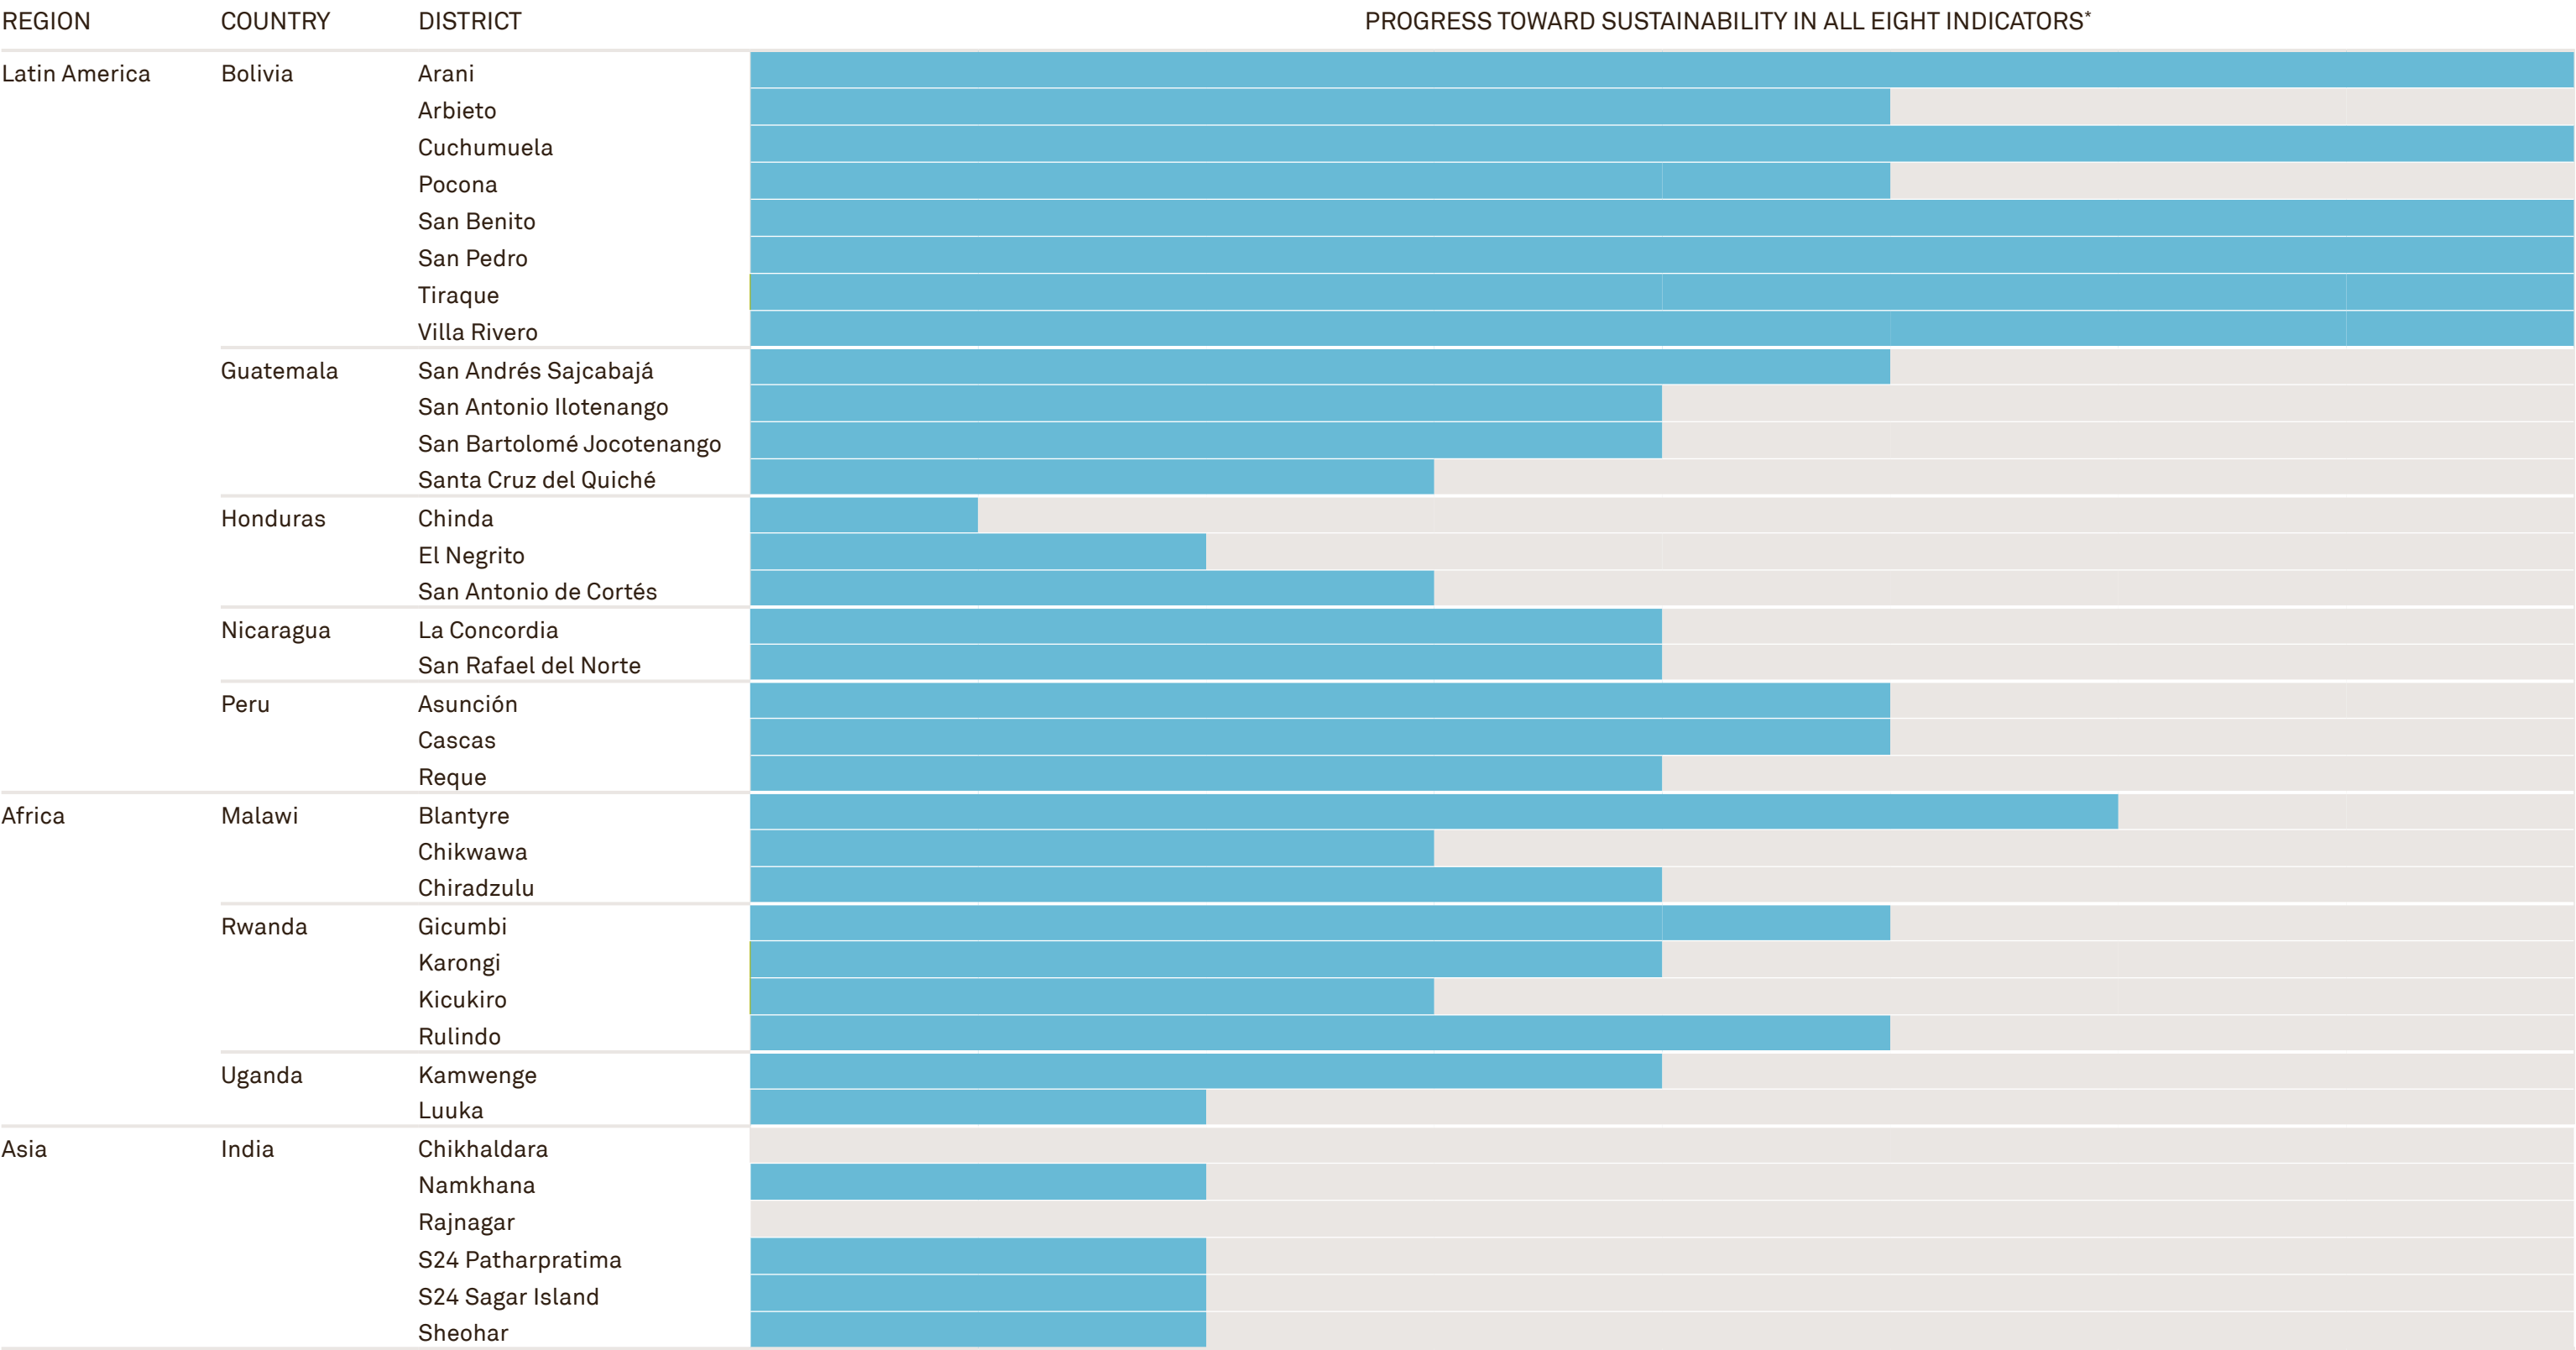

We measure our progress toward reaching Everyone with safe water by working at the community, public institution (schools and clinics), and household levels. When all three milestones are reached, we can confidently declare that Everyone in a district has access to reliable water services. We measure progress toward reaching Forever (water services are sustainable without further investment by Water For People) using the Sustainable Services Checklist (see pages 12-13). This table is a view of past, current, and projected milestones.

*While we currently work in 39 districts, this chart only shows districts projected to reach an Everyone or Forever milestone through 2025.

EVERYONE MILESTONES: Water			FOREVER MILESTONE: Water	
●	Year to reach every household	●	●	Year to reach sustainable services
○	Year household milestone was achieved prior to or with limited contribution from Water For People			

WATER

Sustainable Services Checklist

The Sustainable Services Checklist monitors each district’s progress toward having sustainable water services, considering eight metrics under three categories: service authority, service provider, and water resources management.

* Districts are rated on eight sustainability indicators. This chart shows progress toward sustainability over all eight indicators: Service Authority Structure, Finance, Management, and Monitoring (four indicators); Service Provider Structure, Finance, Operation and Maintenance (three indicators); Water Resources Management (one indicator).

Sustainable Services Checklist

Sustainable	On the Sustainable Services Checklist on the left page, districts are rated on sustainability indicators that include Structure, Finance, and Monitoring of service authority, and two additional service provider indicators in India.
Not yet sustainable

5 YEARS OF IMPACT

STRATEGIC PLAN 2017-2021 RESULTS

We know our Everyone Forever model works, and we just spent the last five years increasing our impact – X 20! Through goals anchored in Proof, Global Leadership, and Scale, we expanded our reach and drew closer to achieving Everyone Forever and Sustainable Development Goal 6.

Increasing our impact X 20 was based on reaching 4 million people at the district (local) level, our overarching Proof goal, and 80 million people at the national level in four focus countries, our overarching Scale goal, by 2021.

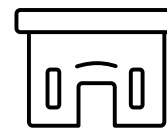

With our government partners at the local level, we exceeded our Proof impact population target of 4 million people by **impacting 4.67 million people with reliable water services**, despite the COVID-19 pandemic.

GLOBAL LEADERSHIP

Global Leadership efforts focused on sharing success and important learnings of the Everyone Forever model to accelerate social change and enhance our thought leadership, reputation, and visibility globally. We co-founded Agenda for Change in 2015, to support collaboration and catalyze sector strengthening through collective action. Agenda for Change has grown to 14 members, working together to support government-led water, sanitation, and hygiene systems in more than 40 countries.

REFLECTIONS FROM COUNTRY DIRECTORS

ANDRÉS ABASTO
BOLIVIA

“Drinking water, sanitation, and hygiene – accessible to all now and forever – is what we do and why we do it. Based on the collaborative work between municipal governments and communities, we are reaching the most remote places for whom having a water tap and bathroom was a distant dream. The community of Thagoni, in Villa Rivero, is one example of where we can see how lives have been changed with access to clean water. Going to the spring for cloudy water is now just a bad memory.”

MARIO VELÁSQUEZ
GUATEMALA

“Santana was born in Quiché, a department that represents the difficult situation in Guatemala, where 59% of the population is poor. Much of Santana’s childhood was spent fetching water from polluted rivers for herself and her family, causing deficiencies in her education and health. In 2019, she learned about Water For People through a community workshop and quickly became a leader in her community – guiding the creation of 35 water connections in homes and at her school, benefiting nearly 200 community members with water access in less than three years. Santana is one of more than 60,000 Guatemalans empowered thanks to Water For People and represents one of the greatest strengths of our organization: not being afraid of change.”

TUPAC MEJIA
HONDURAS

“Resilience, sustainability, and partnership define efforts in Honduras. After the destruction caused by Hurricanes Eta and Iota, communities have prioritized rebuilding water systems, and microfinance organizations continue to support sanitation loans. Strategic alliances among organizations have led to a systemic approach of implementing the Everyone Forever model along with piloting new approaches to public policies, water quality strategy, and more.”

Water For People’s nine Country Directors share their reflections on the impacts that resonated with them and their teams over the past five years.

BISHWADEEP
GHOSE
INDIA

“In Rajnagar, West Bengal, a recent evaluation showed that the level of service for water increased from 86% to 98% from 2019–2021. Water For People’s intervention addressed the issue of unsafe sources of drinking water from unprotected wells and surface water. Now, household members have access to safe drinking water from Mark II hand pumps or from public or private taps and kiosks from a piped water supply – available even during seasonal shortages. This access significantly reduces the risk of water borne diseases among the communities.”

ULEMU CHILUZI
MALAWI

“The Blantyre City Council, Blantyre Water Board (water utility council), and Water For People have a three-way memorandum of understanding to facilitate our long-time work together. This partnership has translated into improvements in water access in the peri-urban areas of Blantyre and achieving the Everyone Community milestone in 2018. With our partner’s support, Water For People piloted and then replicated the management model for communal water kiosks, which target people who cannot afford their own household connections. Ten Water User Associations have been established and they manage approximately 800 water kiosks and employ over 850 people as water sellers, plumbers, and bookkeepers. Over 95% of the employees are women.”

LIZA RIVERA
NICARAGUA

“In 2018, the municipality of San Rafael del Norte achieved the Everyone milestone for communities. Every community in the municipality has access to water. This achievement – the first municipality to achieve water coverage for all their communities – has been recognized by the national government and is being held up as an example to other municipalities.”

GISELA
MURRUGARRA
PERU

“Since Water For People began work in Peru, we’ve been focused on achieving Everyone Forever and are proud of the progress we’ve made. In Asunción, we achieved and maintained the Everyone milestones for Community and Public Institutions. With the local government’s commitment to closing the gap at the household level, we expect full coverage for everyone in Asunción soon.”

EUGENE
DUSINGIZUMUREMYI
RWANDA

“Since Water For People and many government entities partnered in 2010 to launch the Rulindo Challenge, water coverage has increased from 29% to 87% and full infrastructure coverage has been achieved. Rulindo and Kicukiro districts have achieved the Everyone milestone for Public Institutions and Kicukiro has reached every Community with water access. Even more impressive, in three Rwandan districts, more than 99% of the population has access to improved sanitation!”

BRENDA ACHIRO
UGANDA

“In the past five years, the Uganda country team has focused on the untapped opportunity of fecal sludge management. This includes establishing a fecal sludge management process for unplanned settlements in Kampala City – developing Gulper technology (a semi-mechanical pit emptying device), identifying and training pit emptying entrepreneurs, establishing a self-financed, hire-based transport mechanism for fecal sludge, constructing a fecal sludge dumping bay, and influencing government regulators to accept this new service chain.”

For 18 consecutive years, Water For People has received Charity Navigator's 4-star rating – its highest possible score! This longevity places Water For People in the top 1% of all charities. The GuideStar Gold Seal of Transparency indicates our commitment to transparency.

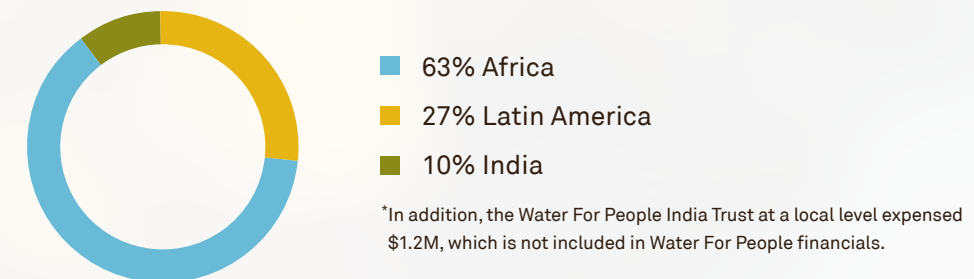

Strategic Investment in FY21: \$260,000

A Strategic Investment Fund (SIF) was created in FY18. The Fund was seeded with \$2,000,000 generated from previous years' financial surplus. The SIF is to be used by Water For People for a range of purposes, including: acceleration of currently programed district level work activities (Everyone Forever), acceleration of scale activities, acceleration of global leadership activities, financial support to local partners, and research and development in water and sanitation.
